

# JETSTREAM

RESIDENTIAL ROBOTIC POOL CLEANER

## Streamline Your Pool Cleaning at the Touch of a Button!

**Simply Plug it in and Press a Button - That's it!**

- ➔ **Completely cleans residential pools from floor to waterline in just 1 Hour!**
- ➔ **Ready to use; No hoses, installation or assembly required.**
- ➔ **DeepClean™ Power Washes what and where brushes can't, while filtering out what pools filters miss!**
- ➔ **Pays for itself; Saves energy, chemicals, water and time, and is virtually maintenance free!**
- ➔ **NeverStuck™ feature rolls over raised drains and in-floor pop-ups.**
- ➔ **Self-Contained with its own internal pump and reusable filter.**

Aquabot JetStream, with its built-in pump motor and reusable internal filter is essentially an energy efficient pool pump and filter on wheels. Built SimplyReliable™, “JetStream” cuts your main pool pump operating costs by up to 60% and eliminates the expense of repeatedly fixing antiquated cleaners of yesteryear.

The JetStream SimplyReliable™ design provides;

- A more powerful circulation flow rate than most main pool pumps
- The ability to clean most pools in as little as 1 hour
- An operating cost of only about 2¢ per hour
- Annual energy savings of up to \$1500+ vs. other cleaner types
- Can replace up to 60% of your pool's main filter and operating time
- Hose-Free cleaning without booster pumps or the pool's pump
- Virtually wear and tear free use; no wings, diaphragms, bearings, etc.

**STREAMLINED FUNCTIONALITY...**

**HYDROSCRUBBING:** Filtered pressurized water emits as power wash jets to DeepClean™ what (sand, silt, pollen, algae) and where (pool pores, seams and corners) brushes and other cleaners can't.

**VACUUMING:** With nearly 10 times the vacuum water flow of suction-side and pressure-side cleaners and more powerful than most main pool filter systems JetStream traps everything from palm leaves and pine needles to solid spheres as large as 1.5” in diameter in its massive reusable 34 quart capacity ultra-durable filter bag.

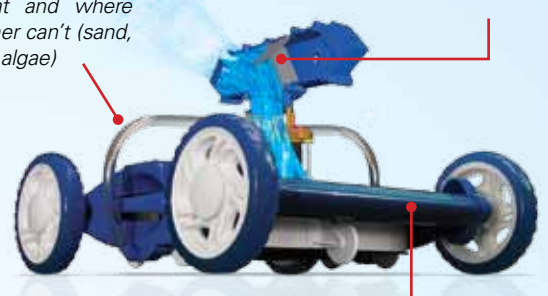

**MICROFILTRATION:** JetStream captures fine dirt particles, such as sand, silt, pollen and algae, as small as 2 microns (that's down to 10 times smaller than what many main pool filters can remove).

**CIRCULATION:** After being filtered clean the water is forcefully expelled out the back (or front) of JetStream on an upward angle to circulate pool water layers. The result is an equalization of temperatures (less heat loss to save energy) and chemicals (for healthier swimming water and saving chemicals).

**HYDRAULIC JET DRIVE:** The expelled clean water also provides hydraulic jet propulsion, driving JetStream without gears, tracks, bearings, pads, costly complex drive motors or other familiar wear and tear parts. JetStream rolls along floors, over in-floor pop-up heads and raised drains, up floor-to-wall radiuses and all the way to the waterline, including most stairs to clean any shape or surface type pool.

*Power washing jets help clean what and where other cleaner can't (sand, silt, pollen, algae)*

*A simple Directional Flap diverts the flow of water to hydraulically propel Aquabot JetStream*

*The Directional Guidance Axle ensures systematic turning every time Aquabot JetStream moves forwards to provide complete coverage of any pool*

**TECHNICAL SPECIFICATIONS CHART**

Pool Size / Type:	Up to 50' Long / All Surface Types & Shapes
Cleaning Time (most pools):	1 Hour
Operating Costs:	Less than 5¢ per cleaning cycle
Warranty:	3 Years / 200 Cycles Prorated
Hydroscrubbing Mechanism:	Patented DeepClean™ Power Wash Jets
Debris Intake Ports:	2 Offset for Clog-Free Operation (1" x 5" up to 1.5" x 5" + 3 Varied Depths)
Suction Port Depths:	Customizable; 3 Depths for Deep Dirt Access
Filter Debris Holding Capacity:	34 Quarts Maximum Volume (Equipped with both Macro and Micro filter bags)
Filtration Particle Size:	Down to 2 Microns
Filtration / Circulation Rate:	4,800 Gallons Per Hour
Drive Feature:	Patented Hydraulic Jet Propulsion
Cleaning Speed:	6,800 Sq. Ft. Per Hour
Surface Obstacle Avoidance:	Patented NeverStuck™ Rollers
Guidance Mechanism:	Patented Directional Guidance Axle
Wheels:	Free Spinning, Non-Marring Wheels
Pump Motor:	High Performance, Brushless / Sealed; Oil Cooled and Lubricated + Water Cooled
Cable Length / Type:	51' / Self-Floating – Kink-Free
Operating Voltage / Wattage:	24v AC / 150w
Forward / Reverse Timer:	Adjustable Digital LED; 1–90 seconds
Timer Auto Shut-Off:	2 Hours Digital / External Timer System Capable
Power Supply:	StayCool™ All Weather Resistant
Electrical Requirements:	110v / 60Hz
Robot / Shipping Weight:	10.75 lbs. / 35 lbs.
Robot / Package Dimensions:	17" x 20" x 11.75" / 19.562" x 18.187" x 17.5

*\*Requires a Minimum 6" long radius between floor and wall to climb.*
