

POOLROVER
SPORT

RESIDENTIAL ROBOTIC POOL CLEANER

Aboveground Pool Cleaning System!

Simply Plug it in and Press a Button - That's it!

- ➔ **Completely cleans the floor of ANY aboveground pool in under 1 Hour!**
- ➔ **Pays for itself; Saves energy, chemicals, water and time, plus it's virtually maintenanc free!**
- ➔ **Ready to use; No hoses, installation or assembly required.**
- ➔ **Independently filters and circulates better than most pool filters for heathier water!**
- ➔ **Rolls over raised drains, liner wrinkles and footprints.**
- ➔ **Self-Contained with its own internal pump and reusable filter.**

The Virtually Maintenance Free Solution to Complete Pool Cleaning in Under 1 Hour!

SimplyReliable™. Virtually maintenance free, Sport works without the multitude of parts found littering pool store walls, without hoses or the need to constantly run costly main pool filters.

Self-Contained Independence. With its own pump and filtration system built-in Aquabot Pool Rover Sport automatically **vacuums, filters, drives (the cleaner)** and **circulates** the pool water.

Greatest savings. On a mere ultra-efficient 24volts, "Sport" powerfully cleans, while **saving you as much as \$500 annually in energy**, up to 30% of your total chemical usage, upwards of 80% of your pool's total annual water loss and protects the environment from chemically treated water.

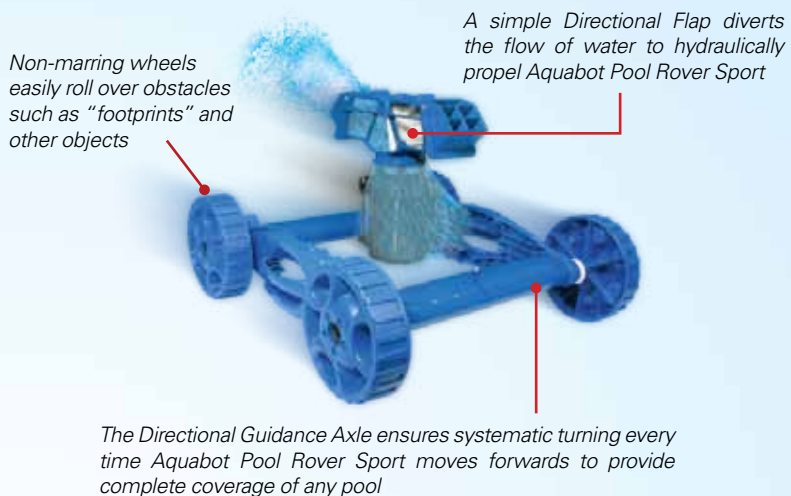

Fast and efficient. This built-in mobile filtration system design provides nearly 10 times the suction flow of any traditional cleaner with about 3 times the cleaning speed, and is up to 10 times more energy efficient - plus it cleans most pools in under 1 hour.

Incredibly effective. Powerful suction and microfiltration removes all debris types, from large palm leaves and pine needles to fine sand, silt and algae, which many pool filters can't remove.

Complete Cleaning of Any Pool. A simple patented turning Axle enables systematic cleaning any residential pool shape without wasting time spinning in circles, stuck behind ladders or completely missing areas of your pool. Thoroughly cleans floors, rolls over raised drains and up a max. of 30° out of deep ends.

Healthiest water. Powerful built-in pump and very capable filter circulate cool clean chemically rich water from below with chemically depleted cooler water above - reducing evaporation and providing more accurate water test samples, while filtering out bacteria and algae down to 10 times finer than most main pool filter systems.

Convenient. Just plug it in and press a button! No hoses or hassles. Lightweight, durable and powerful. Turns itself off when done!

SimplyReliable™!

SPECIFICATIONS	
Specified for Pools	Up to 40' long of any aboveground pool shape
Cleaning Time	30 minutes – 1 Hour (features automatic internal Shut-Off)
Maximum Debris Capacity	34 Quarts
Debris Intake Ports	2 Offset Ports for clog-free operation (Total intake opening of: 2" x 9 2/8")
Filtration / Circulation Rate	4,500 gallons per minute
Drive System	Pat. Jet Drive Propulsion System (on-board, high efficiency brushless pump)
Forward / Reverse Timer	2 Settings (Smaller & Larger Pool)
Floating Cord Length	41' / Self-Floating; Kink-Free
Average Operating Costs	< 5¢ per Cleaning
Warranty	2 Years (100%)
Unit Dimensions	19.75" x 17.5" x 11.75"
Unit / Shipping Weight	10.5 lbs. / 29 lbs.
